| In re: | Case No. 18-03197 FPC |
| GIGA WATT INC., | **MEMORANDUM IN SUPPORT OF MOTION FOR STAY PENDING APPEAL OF ORDER (I) APPROVING THE SALE OF MOSES LAKE EQUIPMENT AND RELATED RELIEF, (II) APPROVING BID PROCEDURES** |
| Debtor | |

## MEMORANDUM

Attached exhibits clearly demonstrate customer ownership of mining machines as well as Trustee

Mark D. Waldron and his attorney Pamel Egan's foreknowledge of the ownership of customer

mining machines despite Trustee's testimony to the contrary under oath with penalty of perjury.

Exhibit A below are pages 1 and 24 out of 268 pages of the Giga Watt Inc. inventory list titled 'AMS Inventory' that the Trustee sent to the counsel for the Official Committee of Unsecured Creditors ("OCUC") on June 4th 2019.  Note the OCUC is currently dissolved.  The AMS inventory list includes 11,712 mining machines with the following labels: ASSET, Identifier, TYPE, Room , ACCT.  The ACCT refers to the customer account categorized by email address.  For example on the second page of Exhibit A (ie. page 24 of AMS Inventory), the email address sg_personal@live.com is listed under ACCT and refers to Scott Glasscock's customer account and clearly shows all the relevant information about the ownership and location of his mining machines.  Hundreds of customers are identified by email addresses on the inventory list, but email addresses are redacted in Exhibit A excerpts for privacy.  Exhibit F shows the entire AMS Inventory list and is also redacted for privacy.  Exhibit G shows a photo of mining machines with their corresponding ASSET tags with barcodes listed on the AMS Inventory list.

Exhibit B below is an email dated May 12th, 2020 from former general manager George Turner that clearly demonstrates customer ownership of mining machines (ie. 'specific servers') and contradicts Trustee's testimony:

> "Also, documentation demonstrating purchases of specific servers by specific clients was, and perhaps still is, stored on GW servers, Woo Commerce servers, and GW's Google Docs account. **As I informed the trustees when I was helping to show them around the Pangborn site,** following the initiation of bankruptcy, there were (and still are), former GW employees who can navigate those servers if given access. **The records stored there clearly link specific servers to their purchasers,** and should include at least an email address to contact the purchaser." **(emphasis added)**

Exhibit C below is an email from Trustee's attorney Pamela Egan dated May 3rd, 2019 to former OCUC counsel Dominique Scalia that clearly acknowledges that Token Holders and Miner Owners did not waive future rights by not objecting to reopening Moses Lake:

> "The Trustee hereby represents that in no filing has the Trustee purported to determine any potential issues regarding the characterization of potential claims held by the Committee's class members, including but not limited to rights of Token Holders and/or Miner Owners.

The Trustee also acknowledges that by not objecting to the motion to approve the Moses Lake re-opening, no creditor is waiving any future rights to reimbursement that would be due from any income generated through the use of property that certain creditors may assert belongs to them**.**"

Exhibit D shows a customer support message from Giga Watt Inc. on January 16th, 2019 that clearly shows there was no question customers owned the machines.  The message states:

"There are some remaining personal pick-ups and/or shipments to **customers whose equipment had already been removed from the facilities prior to lockouts**. Customers will receive an email notification within the next two (2) weeks with the tracking information for their shipments. Please note, if you do not receive an email notification, this means that **your equipment remains in the locked facilities** and any further information relative to **your equipment** will not be known, or available, pending current legal proceedings. This also means that if **you have equipment remaining at the facilities and are attempting to sell said equipment, it will not be available to access and/or ship to anyone**."

Exhibit E shows an email from Giga Watt Inc. dated October 5th, 2017 that clearly communicated to customers that they had an option to 1) ship their mining machines to another location or 2) resell them if they did not want to wait until the infrastructure was completed.

DATED this 13th day of November, 2020.

**Sent:**　5/12/2020 3:03 PM

**To:**　""sg_personal@live.com"" <sg_personal@live.com>

---

To Whom It May Concern;

My name is George Turner, and I was a project manager, and later general manager at Giga Watt, Inc..  I understand there is some confusion concerning ownership of the cryptominers that Giga Watt (GW) operated, and I'd like to offer some clarification.  I'll address two items here: the asset tracking tags found on cryptomining servers, and the purchase records which tie those servers to their purchasers.

Giga Watt tagged all the miners it managed with asset tracking tags.  As I recall, those tags did read something like, "Property of Giga Watt."  That was poor phrasing, as the intent of the tags was twofold: to permit GW employees to more accurately track where a given device was deployed or stored, and to help keep GW-managed servers from being lost or misplaced in colocation mining facilities or warranty repair shops.  The tags were in no way intended to demonstrate GW ownership of those servers - merely GW stewardship of them on behalf of the clients who had purchased them.

Also, documentation demonstrating purchases of specific servers by specific clients was, and perhaps still is, stored on GW servers, Woo Commerce servers, and GW's Google Docs account.  As I informed the trustees when I was helping to show them around the Pangborn site, following the initiation of bankruptcy, there were (and still are), former GW employees who can navigate those servers if given access.  The records stored there clearly link specific servers to their purchasers, and should include at least an email address to contact the purchaser.

I hope this can provide some clarity on the issue of server ownership, and dispel any misunderstandings about GW's intentions.  I also assume this will open me up to reprisals by parties who stand to benefit from a different interpretation of GW's actions and intentions.

Regards,
George Turner

**To:** Dominique Scalia <dscalia@lawdbs.com>
**Cc:** Mark Waldron <mark@mwaldronlaw.com>

Dear Dominique,

Following our call today:

The Trustee hereby represents that in no filing has the Trustee purported to determine any potential issues regarding the characterization of potential claims held by the Committee's class members, including but not limited to rights of Token Holders and/or Miner Owners.

The Trustee also acknowledges that by not objecting to the motion to approve the Moses Lake re-opening, no creditor is waiving any future rights to reimbursement that would be due from any income generated through the use of property that certain creditors may assert belongs to them.

Exhibit D: Giga Watt Customer Support Email - Jan 16th, 2019

**Subject:** [Giga Watt, Inc.] Re: 21529 - facility shutdown - equipment ship info?
**From:** Support <support@giga-watt.com>
**Date:** 1/16/19, 5:02 PM
**To:** "admin@ip2p.io" <admin@ip2p.io>

##- Please type your reply above this line -##

Your request (21529) has been updated. To add additional comments, reply to this email.

**Susie** (Giga Watt, Inc.)
Jan 16, 3:02 PM PST

To All Giga Watt Customers,

As was reported in November of 2018, Giga Watt voluntarily filed with the Bankruptcy Court seeking debt relief and reorganization. Subsequent to the filing, day to day operations continued until now. At present, both access and power to the facilities in which Giga Watt operates have been closed to the company.

There are some remaining personal pick-ups and/or shipments to customers whose equipment had already been removed from the facilities prior to lockouts. Customers will receive an email notification within the next two (2) weeks with the tracking information for their shipments. Please note, if you do not receive an email notification, this means that your equipment remains in the locked facilities and any further information relative to your equipment will not be known, or available, pending current legal proceedings. This also means that if you have equipment remaining at the facilities and are attempting to sell said equipment, it will not be available to access and/or ship to anyone. This should be disclosed

to potential buyers for your protection.

For all who have completed their KYC verification, any cryptocurrency remaining in customer wallets remains available for withdrawal until March and is accessed via the Giga Watt customer dashboard.

The outcome of legal proceedings will determine further information that can be provided to customers. Until that time, there are now only a few employees remaining at Giga Watt who are available to assist you with questions relative to your account withdrawals, KYC verification, and general questions. If there are changes or additions to the information provided in this notification, an update will be provided.

Respectfully,
GIGA WATT, INC.

**IMPORTANT**: For the fastest service, always reply to the email thread of your assigned ticket and make sure the ticket number is included in your subject line. Generating additional tickets by starting new emails will result in slower service and response times.

**admin@ip2p.io**
Jan 16, 2:33 PM PST

hello support,

i hope someone is still responding to emails.

it appears everything has finally been shutdown.

please confirm if this is final and if so send information on how to get my equipment shipped.

also, please send any contact info you have for someone on the business side of the company.

thanks

mark weitzel  ip2p.io/ lodog

Exhibit E: Giga Watt Customer Support Email - Oct 5th, 2017

**Subject:** Giga Watt Hardware Options for mark
**From:** Giga Watt Support <support@giga-watt.com>
**Date:** 10/5/17, 1:52 AM
**To:** <no0@zy2k01.com>

## A Message from the Giga Watt team

mark

  Now that you have received pertinent information regarding your miners, your WTT tokens, and your deployment timeline let's look at options available for moving forward. Internally, the Giga Watt team has been working around the clock, seven days a week, to come up with solutions that will give our customers the best outcomes given the circumstances. We feel that the following options all have their pros and cons, but all will provide a way to move forward.  Knowing your deployment timeline you should now have the information required to make the best decision for your situation.  We have three possible options for moving forward:

- **Option 1: Wait it Out**

Understand and accept the situation for what it is and hold out until your miners are deployed. The risk with this option is that there are still contingent delays related to UL issues being finalized which keep the Pods from being powered up and mining.  However, with this option you have a probable timeline and an understanding of where your hardware sits in the deployment schedule. The downside of this option is that your hardware is sitting doing nothing while difficulty invariably increases while you wait.

- **Option 2: Ship Miners home or to another location**

Have the miners shipped to your home or to another location you authorize us to send to. Giga Watt will cover the cost of all domestic US shipping, international shipping costs will be determined on an individual basis. If you have only a few miners, available space, and power at home, this is a good temporary option.  As we northerners like to say, "winter is coming" and the reality, good or bad, is that these things make great heaters. To use this option please email **shipminer@giga-watt.com** to set up your shipment.

- **Option 3: Sell Your Miners at a Premium**

There is a good market for miners that are in hand and ship today and the retail price is often over what you paid. Although Giga Watt does not directly facilitate the sale of your hardware we can offer to ship your miners anywhere a buying customer is located. If you are interested in selling your miners to another party or through a third-party service please email **sellminer@giga-watt.com**; the sales team will get you started and suggest best practices and trusted sources.

We want to personally take this opportunity to offer our apologies for not meeting the originally proposed deployment schedule. All of us on the Giga Watt team really do feel a great desire to do whatever we can to assist you – we want to ensure we have the best relationship with our loyal customers.  The reality is we are all in this together, blazing trails and

inevitably stepping on the hidden thorns along the way. There are no maps for where we're going – this has not been done before. The combined experience of the team at Giga Watt should give you comfort in knowing that we can navigate these speed bumps and complete this project. You have the support of a company with the highest integrity and always strives to put its customers first. Giga Watt will continue to push to be the best we can and bring to market the awesome opportunity that we have all taken part in.
